

Japanese are smarter than we are? You mean the Danes are smarter than we are? You mean the people in Iceland are somehow more technologically advanced than Americans? That is nuts. Yet right now the White House has taken this position of surrender to these other countries that are leading us in these new technologies. I appreciate your words of optimism because I believe they are the right ones. I want to thank the gentleman from New Jersey for his comments.

Mr. Speaker, to summarize here and comment, we have been talking about a disappointing aspect of our American public policy. The disappointment is that on a whole host of issues, the leader of the free world, the administration that has the capability of rallying this Nation to tremendous positive change from an environmental perspective, the administration that has within itself the ability to adopt rules to try to reduce kids from having asthma, is going the wrong way. The administration that has the ability to reduce the amount of arsenic and selenium and cyanide in our drinking water is going the wrong way. The administration that has the ability to assure that the last one-third of our national forests that have not been clear-cut so our grandkids will be able to see those forests some day is going the wrong way.

The administration that has the ability to lead the world to deal with this problem of climate change so that we can keep this general system as we have it, the way we grew up, so that it rains when it should and it gets cold when it should, is going the wrong way. The administration that has the ability to make sure that mines do not leak toxic substances is going in the wrong way. The administration that has the ability to make sure that our Superfund site rules, so that you do not have to pay for the toxics in the soil that get the cleanup, the polluters have got to pay for it, is going the wrong way. The administration that has the ability to get our cars to be some modest level, better efficiency to save us money and save the environment is going the wrong way. It is a sad story to have to say this today, because we are a great, optimistic, and creative people and we have the ability, the heart and the desire to leave this planet as good as it was when we were born.

I stand here today to say that this House should join the U.S. Senate and the administration to go forward on the environment rather than backwards, and this administration is going to turn on a dime and go 180 degrees different from where it is going right now, which is backwards on the environment. I urge anybody that feels the way I do to take every step you can to see to it that we go that way.
